Summary

Computer Science graduate and Full-Stack Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Proven track record of building production-ready web applications, secure RESTful APIs, and responsive user interfaces. Highly skilled in frontend global state management utilizing Redux to optimize application performance.

Education

Abdul Wali Khan University Mardan

Mardan, Pakistan

awkum.edu.pk

Bachelor of Computer Science

Jun 2020 – Jul 2024

Experience

Sahibzada Institute

Mardan, Pakistan

Web Development Instructor

May 2025 – Aug 2025

- Designed and delivered Front-End development curriculum covering HTML5, CSS3, JavaScript, React.js, and React Routing Basics.
- Guided students in building interactive front-end projects including single-page applications.
- Implemented project-based learning approach for 20+ students.

Government High School

Mardan, Pakistan

Computer Lab Instructor

Nov 2024 – Apr 2025

- Delivered engaging computer science lessons including HTML, CSS, and Programming Fundamentals.
- Maintained and optimized computer lab systems for a smooth learning environment.
- Introduced basic web design concepts to inspire students.

Projects

VideoHub — Full Stack Video Streaming Platform (YouTube Clone) Live Demo — Github
React.js — Redux — React Router DOM — Tailwind CSS — Node.js — Express.js — MongoDB — JWT — Cloudinary — Bcrypt — Multer middleware — RESTful API

- Developed a full-stack YouTube-inspired video streaming platform using the MERN stack.
- Built secure authentication and protected routes using JWT and Bcrypt.
- Implemented video upload system with Cloudinary integration and Multer middleware.
- Created public Home page for browsing videos without authentication.
- Developed private user features including profile management, liked videos, and comment system.
- Managed global state using Redux and implemented dynamic routing with React Router DOM.
- Designed responsive and reusable UI components using React.js and Tailwind CSS.
- Integrated RESTful APIs using Node.js, Express.js, MongoDB, and Fetch API.

E-Commerce Store

Live Demo — Github

React.js — Redux — React Router DOM — Tailwind CSS — EmailJS

- Developed a responsive e-commerce platform with product catalog and dynamic routing.
- Implemented advanced product filtering by price, color, and size.
- Created shopping cart functionality with Redux state management.
- Designed a modern UI with Tailwind CSS including a responsive navbar.

Blog Website – Full-Stack Web Application

Github

React.js — Redux — Routing — Tailwind CSS — Authentication — Appwrite

- Implemented user authentication with email/password validation.

- Restricted post access for unauthenticated users.
- Built Home, All Posts, and Add Post pages with CRUD functionality.
- Utilized Appwrite authentication, database, and storage services.

Code Fusion Hackathon — Air-Bnb Website

Github

- Developed complete front-end for Airbnb platform using React.js and Tailwind CSS.
- Built responsive UI components with mobile-first approach for all devices.
- Implemented dynamic routing and interactive features for seamless user experience.

Achievements

Meta Hacker Cup

- Ranked 8,079th / 13,000+ worldwide.

Skills

- **Frontend Development:** React.js, Redux, React Router, Tailwind CSS, HTML, CSS
- **Backend Development:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB
- **Programming Languages:** JavaScript (ES6+)
- **Authentication & Tools:** JWT, Bcrypt, Cloudinary, Multer, Appwrite
- **Version Control:** Git, GitHub
- **Tools:** Visual Studio Code, Postman
- **Deployment:** Netlify, Railway

Certifications

Introduction to Front-End Development - Coursera

- Web Development Tools
- Responsive Design
- HTML/CSS
- User Interface

Using MySQL Database with PHP - Coursera

- Back-end Development
- Database (DBMS)
- PHP
- MySQL
